

D3: how much of the recoverable loss each controller took back, and who paid

Victims canneal, npb_cg_d80, npb_ep_e; donors npb_mg_d300, llama. Live and replay rows are graded in different llama phases (ledger \$20b), so compare them with care. npb_cg_d80 flips between two modes at 4-5 ways (± 10 pp, \$18b), so CATch, SpiderSense and dCat harm values are averages over that. Per-run values: headline_d3.png.
